27 million seniors and people with disabilities choose Medicare Advantage. Unlike traditional Medicare, Medicare Advantage delivers better services, better access to care, and better value, and continues to receive high rates of satisfaction from members who use it.

Reducing Costs for Taxpayers
Medicare Advantage also helps drive down costs for taxpayers: the more people who enroll in Medicare Advantage, the slower costs grow for traditional Medicare.¹

Promoting Health & Peace of Mind
In the wake of COVID-19, Medicare Advantage plans took action to ensure members had access to necessary services, including eliminating patient cost-sharing for diagnostic testing, treatment, and vaccines for COVID-19, expanding telehealth services, and more. Medicare Advantage also keeps seniors and people with disabilities healthier, outperforming traditional Medicare on 16 of 16 clinical quality measures.²

Popular and Growing
Medicare Advantage plans cover 27 million Americans—about 44% of all those eligible to enroll. People are choosing Medicare Advantage plans because they deliver better services, better care, and better value.³

Medicare Advantage Delivers Better Services
Medicare Advantage provides the same benefits as traditional Medicare—and so much more. Examples include:

- In-home support services
- Wellness programs
- Vision, hearing, and dental benefits
- Transportation and meal delivery benefits
- Companion care
- Care coordination and disease management

Payments Equivalent to Traditional Medicare
Today, the average payment to Medicare Advantage is no more than costs for traditional Medicare. But because Medicare Advantage plans deliver more benefits and better value than traditional Medicare, Americans are getting more for less.⁴

Overwhelming Support for Medicare Advantage
Not only do those who choose Medicare Advantage report overwhelming satisfaction (94%) with their plans,⁵ but Medicare Advantage has strong bipartisan support among policymakers, too. In 2020, a record 403 Members of Congress signed onto bipartisan letters in support of the program.⁶

Providing Better Financial Security
Medicare Advantage protects members’ health and financial security. For 2021, the average Medicare Advantage monthly premium is estimated to be $21.00, representing a 34% decrease since 2017. By keeping costs low, Medicare Advantage ensures those living on fixed incomes—like the 40% of Medicare Advantage members¹ who make less than $25,000 a year—have access to stable, affordable health care.
