AHIP’s **Employer-Provided Health Coverage: State-to-State** details the important role health plans play in all 50 states and Washington, D.C. This report catalogues what health plans contribute in terms of:

- **Access to health care coverage**
- **Number of jobs the industry generates, both directly and indirectly**
- **Number of active physicians and community hospitals financed**

Data for this report were compiled from various sources (please see end of the report for a detailed list) and represents the most recent and complete information available. Due to the lack of synchrony in the organizations’ reporting cycles, some data are less recent than others.

Data compiled by AHIP, Center for Policy and Research, April 2021
Sources & Notes

1. Population Coverage: Covered by Employer Insurance

Sources:
Kaiser Family Foundation (KFF) estimates based on the 2019 American Community Survey. Available at: https://www.kff.org/other/state-indicator/total-population/ (accessed on April 12, 2021).

Notes:
“Employer Insurance” includes those covered through a current or former employer or union, either as policyholder or as dependent.

“Other” includes those covered by Medicaid, Medical Assistance, Children’s Health Insurance Plan (CHIP), or any kind of government-assistance plan for those with low incomes or a disability; Medicare, Medicare Advantage; the military, Veterans Administration; or by a policy purchased directly from a health insurance provider.

2. Health Insurance Employment - Employees, Direct

Sources:
U.S. Census Bureau 2018 County Business Patterns (NAICS) report. Direct jobs are defined using the insurance industry NAICS codes 524114 (direct health and medical insurance carriers) and 621491 (HMO medical centers).

Notes:
The U.S. Census Bureau could only provide direct jobs data for NAIC 621491 (HMO medical centers) for Arizona, California, Colorado, Florida, Washington, D.C., Georgia, Hawaii, Illinois, Maine, Maryland, Massachusetts, Minnesota, Nevada, New York, Oregon, Pennsylvania, Virginia, Washington, and Wisconsin. Only states that included information on number of jobs and payroll were used in this calculation.

3. Health Insurance Employment - Employees, Insurance-Related

Sources:
U.S. Census Bureau 2018 County Business Patterns (NAICS) report. Other insurance-related jobs are defined using the insurance industry NAICS codes 524130 (reinsurance carriers), 524210 (insurance agencies and brokerages), 524291 (claims adjusting), and 524292 (third party administration of insurance and pension funds).

Notes:
The U.S. Census Bureau was not able to supply data on NAIC 524130 (reinsurance carriers) for the following states: Alabama, Alaska, Arkansas, Delaware, Hawaii, Kentucky, Louisiana, Mississippi, Montana, Nevada, North Dakota, Rhode Island, South Dakota, Utah, Vermont, West Virginia, Wisconsin, and Wyoming.

The U.S. Census Bureau was not able to supply data on NAIC code 524291 (claims adjusting) for Washington, D.C.

Only states that included information on number of jobs and payroll were used in this calculation.

4. Active Physicians Financed by Employer Insurance Payments

Sources:
Kaiser Family Foundation (KFF) estimates of professionally active physicians based on the data on active state licensed physicians from Redi-Data, Inc, September 2020. Available at: https://www.kff.org/other/state-indicator/total-active-physicians/ (accessed on April 12, 2021).

Data compiled by AHIP, Center for Policy and Research, April 2021
Kaiser Family Foundation (KFF) estimates based on the 2019 American Community Survey. Available at: https://www.kff.org/other/state-indicator/total-population/ (accessed on April 12, 2021).

Notes:
To calculate the number of professionally active physicians supported by employer-provided coverage payments, AHIP first determined the proportion of physician and clinical services paid by private health insurance based on the NHE data. Because private health insurance is a combination of group insurance (almost entirely employer-provided) and individual insurance (non-employer), AHIP used the KFF coverage estimates to calculate the share of physician and clinical services paid by group insurance and used it as the best available national estimate of physician and clinical services funded by employer-provided coverage. The resulting proportion was applied to the KFF estimates of professionally active physicians by state to arrive at the state estimates for the number of professionally active physicians supported by employer insurance payments. Please note that these estimates are to be used for illustrative purposes only since most of professionally active physicians accept payments for medical services from a variety of insurance types and that professionally active physicians differ by amount of medical care provided and financial payments received.

Data includes currently active allopathic physicians (MDs) and osteopathic physicians (DOs).

5. Community Hospitals Supported by Employer Insurance Payments

Sources:

Kaiser Family Foundation (KFF) population health coverage estimates based on the 2019 American Community Survey. Available at: https://www.kff.org/other/state-indicator/total-population/ (accessed on April 12, 2021).

Notes:
To calculate the number of hospitals supported by employer-provided coverage payments, AHIP first determined the proportion of hospital care paid by private health insurance based on the NHE data. Because private health insurance is a combination of group insurance (almost entirely employer-provided) and individual insurance (non-employer), AHIP used the KFF coverage estimates to calculate the share of hospital care paid by group insurance and used it as the best available national estimate of hospital care financed by employer-provided coverage. The resulting proportion was applied to the KFF estimates of community hospitals count by state to arrive at the state estimates for the number of hospitals supported by employer-provided coverage payments. Please note that these estimates are to be used for illustrative purposes only since every community hospital accepts payments from a variety of insurance types and that hospitals differ by amount of hospital care provided and financial payments received.

Data are for community hospitals, which represent 85% of all hospitals.
6. **Average Employee Contributions to Premiums as Share of Median Income**

11. Access to Insurance - Employer-Sponsored Insurance by Type

Sources:

Notes:
The survey statistics describe coverage practices of the private sector companies and exclude government, the unincorporated, and self-employed with no employees.

12. Employees With Access to Additional Health Benefit Offerings (Regional)

Sources:

Notes:
The National Compensation Survey provides employee benefits statistics on the U.S. Census Division level. Thus, in this data compilation every state in the same U.S. Census Division was assigned the same rate of employee benefits.
